Khalil – requested board approval for special meeting, a motion by J. Shumaker to have a "special board meeting Oct 14 (tentative between 2-4PM) to meet with State Senator Kehoe to discuss airport issues was approved MSC (Q, SK, CV, SB, HK,, JS, DK, JL, DD, MS) – (Q) – (1 NG).
- E. BU Digester Gas (Ad Hoc): D. Davis – reported on his notes taken from City's Sep. 9th meeting as follows :
 - City brought a facilitator to meeting to keep group efficient/organized- questions and answers format was executed at well attending meeting (approx. 200people)
 - SDGE stated they have reversed their position from 3 years ago and is now interested in option mixing methane gas into their existing system and delivering through underground piping (majority of existing piping could be utilized) .
 - Similar mixing of gas into underground system has worked successfully in northern CA.
 - Developer rep stated they're interested and support option mixing methane gas and delivering through underground piping if City will renegotiate current contracts involving trucking system .
 - SDGE and Developer are optimistic but need approx. 2 months to confirm this can be done and establish costs. (so this revised option is not officially yet approved by all stakeholders)
 - Rules for for approx. 14.5 million in grants still need to be complied with even if SDGE subterranean system is incorporated into project (SDGE and Developer are optimistic rules can still be met)
 - State requires that City and SDGE provide 20% renewable energy (this extra methane gas would qualify)
 - Recent Neighborhood groups (P also organized and put pressure (well timed) on Councilman Falconer's office to oppose trucking with safety concerns
 - Councilman Falconer stated that they will not support trucking through our community and will push other alternatives

After a discussion a motion by D. Davis which states: PCPB supports and requests measures be taken by City officials for underground delivery of captured methane via SDGE (even if project is delayed or increases cost) so that trucks are not used in transport of methane through our community.
